"In Relentless Pursuit of Medical Readiness!"

U.S. ARMY MEDICAL MATERIEL AGENCY

Semper Responsus

Medical Logistics Management Internship Program (MLMIP)

The United States Army Medical Materiel Agency (USAMMA) Internship Program provides Officers, Warrant Officers, Senior Noncommissioned Officers, and Department of Defense (DOD) Civilians in the medical logistics field with the advanced training needed to succeed in an ever-changing military mission. This premier education opportunity will:

Reinforce Your Logistical Foundation

Increase Your Knowledge and Skills

Expand Your Network

USAMMA is a unique, multifaceted organization whose central purpose is to execute medical logistics programs that directly support Army readiness and other critical health care missions. USAMMA functions as the Army Medical Department's logistics operations agency under the United States Army Medical Research and Materiel Command.

The Agency's three essential roles are to (1) provide medical materiel lifecycle management and logistics support across the full spectrum of DOD health care missions worldwide; (2) develop and implement innovative logistics concepts and technologies; and (3) serve as the Army agent for medical materiel and sustainment programs.

USAMMA performs its vital roles through the following functional Directorates:

- **Force Projection**
- **Force Sustainment**
- **Materiel Acquisition**

USAMMA MLMIP

MLMIP provides the medical logistician with an overview of the support health care environment. The program focuses on Medical Logistics Support, Advanced Technology, Business Practices and Management Techniques, DOD and Civilian Health Care Organizations, DOD and Department of the Army (DA) Systems and Processes, and Materiel Acquisition.

The goals are to (1) develop logisticians for strategic-level programs emphasizing Joint and Army readiness; (2) provide experience and knowledge concerning leading-edge technology, organizational innovation, and defense acquisition; and (3) combine the best of defense and commercial health care logistics business practices.

MLMIP is a six-month program offered twice a year, beginning in January and July. The goals will be further defined as the Intern visits a variety of organizations and institutions. Some of these include:

- **Office of The Surgeon General**
- **U.S. Army Medical Command**
- **U.S. Army Medical Research and Materiel Command**
- **U.S. Army Medical Materiel Center, Europe**
- **The Pentagon**
- **Walter Reed Army Medical Center**
- **Defense Supply Center, Philadelphia**
- **Sierra Army Depot**
- **Hill Air Force Base**

Civilian institutions also play a significant role. Tours and visits of various commercial facilities afford the Intern the opportunity to learn innovative business practices and exchange ideas on latest technological advances. Some of these include:

- **Emergency Care Research Institute**
- **Logistics Management Institute**
- **Texas Medical Center**
- **Johnson and Johnson**
- **Federal Express**

Also covered: supply chain management, facilities management, defense transportation, contracting fundamentals, waste management, financial management, project management, and effective communications training, to name a few.

You, as the Intern, will be challenged with individual and group research topics that will focus on today's issues relevant to operational and strategic-level logistics.

You will gain the logistical perspective and the know how to think "out-of-the-box." No other program gives you a better overview of wholesale medical logistics. The knowledge and experience you gain will place you a step ahead of your peers and better prepare you for leadership roles and tomorrow's challenges.
