UNIT PRICE: $5,457.00

System Description: The DEPMEDS containers are used in direct support of the Surgeon General's fielding of the Deployable Medical Systems (DEPMEDS). They are used for shipping and storage of the components for various operating rooms, medical support, and laboratories, which comprise the DEPMEDS. The DEPMEDS container is designed to ANSI/ISO standards and is produced from a military performance specification. The container is constructed of steel with hardwood flooring, and the interior walls are lined with plywood. The floor and inside walls contain tie down rings for securing cargo. The container is equipped with one double door opening on the side and one double door opening at the rear end of the container.

NOTE: This Manufacturer no longer in business. Check inventory.

System Description: This automatic counter transfers tablets and capsules directly into the final container. It counts the average prescription and feeds it into a vial in less than 4 seconds. The counting technology used guarantees the most accurate counting available in any automatic system.

Features: Accuracy: 99.97% (less than 3 errors in 10,000 tablets)
Maximum count: 500 tablets or capsules or 85 drams
Maximum throughput: 1,500 parts per minute
Maximum size counted: not applicable. Counts the largest known tablets and capsules

USAMMA POC: Customer Relations Management 301-619-1288/4301 - DSN 343-1288/4301
UNIT PRICE: $8,148.27

System Description: The Horizontal Laminar Flow (BZ) Series Hood is designed for the handling of materials in a sterile working environment. The work area is continuously bathed with positive pressure ISO 5/ Class 100 horizontal laminar flow air that has passed through a High Efficiency Particulate Air (HEPA) filter. This filter removes organisms and particulates 0.3 micron in size with an efficiency of 99.99%. The laminar flow principle consists of moving individual streams of unidirectional, ultra-clean air along parallel lines with minimal turbulence. The HEPA filter is positioned in the rear of the work area and is protected by a removable, perforated metal diffuser. The BZ is constructed of quality all-welded stainless steel with a pharmaceutical grade finish. The fluorescent light housing is externally mounted to provide optimum lighting into the work area. The acrylic top and side panels allow for additional ambient light and visibility into the work area. Our SpillGuard feature is utilized in the rear and sides of the full-width work area. The CurveFlex forearm support feature provides operator comfort.

Features:
- Outer cabinet and work surface are welded stainless steel with a pharmaceutical grade finish
- High capacity motor/blower system with speed control to extend HEPA filter life
- Top mounted pre-filters are easily changed
- HEPA filter is full width and height (36”), ensuring unidirectional airflow and is easily changed from both sides
- Top mounted fluorescent lighting is isolated from the clean environment
- IV hanging bar with 12 hooks in work area
- Separate lighted power ON/OFF indicator switches for blower and lighting
- Electrical is 115Volt, 60 Hz (220/50-60 Hz also available)
- Ten foot power cord with molded grounded plug

UNIT PRICE: $176,141.00

System Description: Army ISO shelters are compatible with military and commercial handling equipment and can be transported by all modes of transportation including cargo container ships, C-130, C-141, C-5A and C-17 military aircraft, trucks, trailers and the M1022A1 ISO Dolly Set. These shelters are comprised of individual replaceable panels that are either bolted or hinged into place. These panels are fabricated by hot bonding aluminum skins to resin impregnated paper honeycomb core material. Each ISO shelter is wired for three phase electrical distribution and is integrated with internal fluorescent lights, 120 VAC, 20 amp electrical outlets, an external area light, and an interface for external environmental control units. Each shelter is also equipped with leveling jacks and can be erected in the field by four people in less than thirty minutes without any special tools. Complexing capability with 58" × 77" knockout panels is available for One-Side and Two-Side Expandable ISO shelters.

System Description: This sink supplies hot and cold water and is mounted on four detachable casters. It is a self contained sink with a tankless electric water heater and pump.

Features:
- Removable faucet with a gooseneck spout
- Paddle shaped handles to control the water flow
- Foot activated, externally mounted soap dispenser
- Two recessed carrying handles on each side
- Two doors
- A 10-foot water supply hose with auto shut-off and quick disconnect couplings
- Water temperature adjustable from 100˚F to 145˚F
- Corrosion-resistant steel (CRS) top and sink
