Medical, Chemical, Biological, Radiological, and Nuclear Defense Materiel (MCDM)

USAMMA enhances readiness by fielding countermeasures used in the protection and treatment of Soldiers in the event of a chemical, biological, radiological, or nuclear attack. These counter measures include: pretreatment, treatment, antidotes skin decontamination and Potency and Dated (P&D) items for the Medical Equipment Set, Chemical Agent Patient Treatment.

To ensure immediate availability, the MCDM is positioned at strategic locations worldwide and prepared for rapid shipment to deploying units.

All Initial Issue Deployment MCDM is centrally funded and managed. This materiel is free issued to deploying or forward deployed forces in coordination with OTSG release approval.
