USAMMA POC: Customer Relations Management, 301-619-4301/4316, DSN 343-4301/4316
UNIT PRICE: \$11,271.08

System Description: The compression plate system is part of a stainless steel and titanium plate and screw system that merges locking screw technology with conventional plating techniques. A dynamic compression plate (DCP) is a metallic plate used in orthopedics for internal fixation of bone, typically after fractures. As the name implies, it is designed to exert dynamic pressure between the bone fragments to be transfixed. Dynamic compression is achieved either by attaching a tension device to a plate or by using a special dynamic compression plate.

Features:

- Combi hole allows surgeon to choose between conventional plating techniques, locked plating techniques, or a combination of both
- Threaded hole section for locking screws provides ability to create fixed-angle constructs
- Smooth Dynamic Compression Unit (DCU) hole section for conventional screws allows utilization of familiar AO plating techniques

PLATE SET BONE COMPRESSION

MODEL# 105.23

NSN 6515-01-308-6378

**PLATE SET BONE COMPRESSION SHOWN WITH COVER
 MODEL# 105.23
 NSN 6515-01-308-6378**

**PLATE SET BONE COMPRESSION
 PHYSICAL & ENVIRONMENTAL SPECIFICATIONS**

Dimensions	Length	19 inches
	Width	10 inches
	Depth	1.5 inches
Cube		0.2 cu ft
Weight		8 lb
