## **PERFORMS BEST UNDER PRESSURE**

The A.T.S. 1200 Tourniquet System addresses the most important concerns in tourniquet system design, providing the features that health care facilities demand for safety, reliability, and convenience.

Low-profile cuffs stay in place without discomfort. Select reusable cuffs or disposable sterile cuffs to eliminate cross-contamination. Cuff sleeves help reduce wrinkles, pinching, and shearing of soft tissue.

Positive-locking connectors supply safer, leak-free inflation.  
Angled ports keep connectors clear of the surgical site.

Visual and audio alarms readily detect pressure variations.  
Lightweight portable unit can be mounted on an I.V. pole or placed on a table  
45-minute battery backup to help ensure continuous power.
