USAMMA POC: Equipment Acquisition Division, 301-619-4060, DSN 343-4060

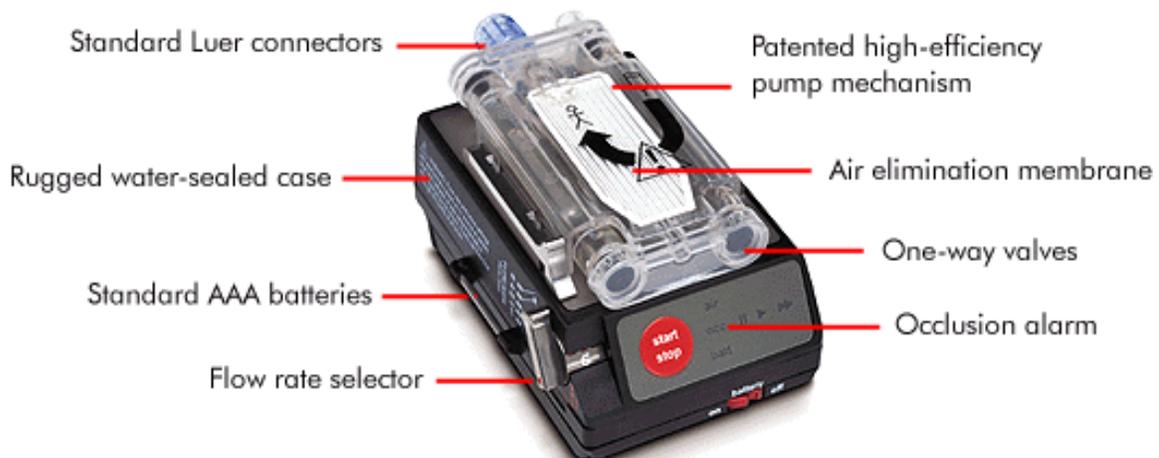

UNIT PRICE: \$1,855.72

Features: The Power Infuser® is the first portable electronic infusion pump designed explicitly for crystalloid and colloid IV fluid management. Small, durable, and easy to use; it can be used at the scene of an accident, during transport, or in the hospital.

Controlled Delivery Improve adherence to protocols; ensure adequate, but not excessive, hydration Whether restoring intravascular volume during circulatory compromise or rapidly infusing a bolus during hemodynamic assessment, the Power Infuser allows unprecedented control of fluid administration. Adjust flow rates from 0.2 to 6 liters per hour or activate the automated 250cc bolus feature.

Occlusion Detection Don't let a blown IV site or kinked line go unnoticed. With a unique downstream occlusion sensor, the Power Infuser responds to excessive resistance in the fluid path by switching to standby and activating an alarm. Head off complications that could arise from an interruption in flow.

Patient Management Provide life-saving fluid resuscitation when a lack of personnel or room to elevate the bag impedes treatment. Avoid accidental infusion of air with unique membranes built into each crystalloid/colloid pump cartridge. This device is valuable when battlefield injuries occur, during mass casualty events or for critical care transport.

	Part Number NSN	Description	Unit
	0040-0013 6515-01-499-5112	Power Infuser® model M100B-3A. Includes bolus setting and uses standard AAA batteries.	each
	0040-0050 6515-01-466-1488	Crystalloid/colloid pump cartridges for the Power Infuser. Includes 18in pump-to-patient tubing set. Sterile, single-use only.	box of 10
	0040-0040 6515-01-466-1481	AC/DC power adapter for the Power Infuser. Wall-mounted, US-type 120VAC plug.	each
	0040-0070 6515-01-470-9907	IV pole clamp for the Power Infuser. Includes IV bag holder and adjusts for horizontal or vertical mounting.	each
