**System Description:** The HemoFlow 200 Blood Draw monitor is a lightweight, battery-powered monitor. Features programmable collection volume, automatic flow monitor with audible and visual alarms, and automatic clamping upon draw's completion.

The HemoFlow™ Model 200 monitor provides an affordable solution for upgrading from traditional scales and trip mechanisms.

The Model 200 includes all of the electronic features needed to help increase successful units, such as automatic clamping at the end of the draw, low flow monitoring and programmable collection volume.

**Features:** Weighing only 1 lb, the HemoFlow™ Model 200 monitor simplifies transport and handling. It is a perfect choice for blood banks that require an affordable upgrade solution and mobility. Features and benefits include:

- Easy, one minute set up time.
- Simple, two-step calibration.
- Programmable collection volume.
- Auto-tare feature simplifies the use of different bag sets.
- Users can learn how to use the HemoFlow quickly, with just three basic steps:
  1. Hang the bag on the hook.
  2. Insert the tubing.
  3. Press the START key.
  
- Interactive CD-ROM training provides step by step lessons for new users.
- Outstanding battery life: 3-4 months, or between 960-1280 donations of use on 4 "AA" alkaline batteries. Battery life calculation is based on continuous operation five days a week, 15 draws per day.
- Precise leveling is not required.
