UA: 504A

**USAMMA POC: Materiel Acquisition Directorate, 301-619-7403, DSN 343-7403
UNIT PRICE: \$23,575.00**

System Description: The Haemonetics MCS+® (Multi Component System) addresses the traditional drawbacks of platelet therapy, because it automates the platelet collection process permitting the collection of greater quantities of platelets from a single donor.

Features: The machine collects whole blood from a healthy donor into a sterile, single use disposable kit. The blood flows into a plastic bowl (part of the disposable kit) and through centrifugal force is separated into its component parts. The platelets are harvested into a collection bag, and the remaining blood components - plasma and red cells - are returned to the donor. The advantages of this system are two-fold: (1) the collection of up to two therapeutic doses from a single donor, and (2) platelet transfusion safety for the recipients, thanks to the reduction or elimination of pooling.

APHERSIS DEVICE PLATELET THERAPEUTICS PHYSICAL AND ENVIRONMENTAL SPECIFICATIONS

Dimensions (Open for Operation)	Height	27 inches
	Width	22.25 inches
	Depth	22.25 inches
Cube		7.74 cu ft
Dimensions (Closed)	Height	17.25 inches
	Width	22.25 inches
	Depth	13.38 inches
Cube		2.97 cu ft
Weight		56 lbs
Operating Temperature Range		50° F to 80.6° F
Storage Temperature Range		-4° F to 122° F
Relative Humidity (in use)		8 to 80%
Relative Humidity (storage)		Less than 95% Non-condensing
Power Requirements +-10%		100 VAC 46/63 Hz
Amps		5 amps
Watts		500 watts
