**System Description:** The multi-channel infusion system brings clinical versatility to drug infusion technology. The instrument combines three independent infusion channels with features like dose rate calculation and portability in a small, compact size.

**Features:**

- A small, compact size and lightweight design
- Reduced bedside clutter
- Accuracy - delivers intravenous, intra-arterial, epidural and subcutaneous applications
- Flexibility - deliver a wide range of fluids from various containers, including syringes, utilizing a syringe adapter set
- Versatility - can travel with patients in the field throughout their hospital stay, meeting a wide range of infusion needs; unique clamping system allows pump attachment virtually anywhere.
- Set-based free-flow protection - SmartSite<sup>®</sup> needle-free valve ports and standard injection ports are available
- Dose rate calculation, single-page programming, selectable drug library and titration of drugs by the user in either dose or volumetric rate
