System Description: The Model ME-18W is designed for high volume usage and features a full eighteen (18) gallon capacity. The cleaner generates ultrasonic waves that create millions of microscopic cleaning bubbles through the process of cavitation. The bubbles gently clean and polish any surface they come in contact with, penetrating every nook and cranny to dislodge trapped dirt and debris. Medical Instruments, and glassware are quickly restored to their original lustrous finish, without expending any elbow grease. The gentle ultrasonic cleaning action is ideal for delicate items too.

Special Features: Automatic overload protection; 20 KHZ, mounted on 4/5 inch lockable conductive rubber casters, adjustable height, for use in central materiel supply section of Medical Treatment Facility. There is a one year warranty on the Ultrasonic Cleaner.
