DSN 343-4301/4316

UNIT PRICE: \$439.00

System Description: A portable mechanism activated by air pressure for relieving pressure on the skeletal system. Patented design combines rotating neck wedges with the ability to adjust the width of the neck wedge mechanism for the most comfortable home cervical traction treatment available.

Features:

- Directs traction forces through the chin toward the occiput (back of the head) thereby preventing compression of the TMJ (Temporomandibular Joint)
- Applies up to 50 pounds of traction
- Allows traction in the supine position
- Includes patented self-adjusting neck wedges that rotate through a 30° arc and are removable for easy cleaning
- Adjustable extension foot for additional traction angles of 20-25°
- Ensures safety – user has total control of force at all times
- Enables easy traction without assistance
- Includes instructional video, user's guide and deluxe carrying case
- Patented pump design incorporates an easy-to-use "click-in-place" mechanism for pumping, sustaining and releasing the traction
- Gauge reads in pounds/kg of traction to provide feedback to the user and to promote consistency in treatment
