**System Description:** The Clinitek Advantus is the next generation of the Clinitek 500 Analyzer. This self-pacing compact analyzer is designed to increase productivity and enhance the efficiency in a semiautomated urinalysis laboratory. Innovative system offers automatic reagent strip detection, multiple printed report formats, rapid recall of patient results and enhanced data management, including consolidation of microscopy results. Increase accuracy and confidence delivered through automatic calibration with each sample and barcode entry of patient sample information.

**Features:**

- New, easy-to-use color touch screen (see below)
- Ability to consolidate microscopy results onto one patient record
- Increased control with automatic QC prompting and QC lockout capability to ensure compliance
- Testing flexibility with simple, one-touch switching between different strip configurations
- A total of three sieve functions – confirmatory and microscopic to flag abnormal results for quick review
- Convenient data retrieval for up to 500 patients by patient id, and 200 control results
- Streamlined operation with immediate start-up
- Improved efficiency with nonpacing processing
- Improve accuracy with automatic calibration for every strip
- Continued productivity boost with throughput of 7 seconds per sample
- Minimize errors with simple, barcode identification of sample, color and clarity values
- Flexibility in reporting options, on-screen display, printout and/or uploading to laboratory information system
