System Description: The dry heat incubator has an anodized aluminum heating block that provides excellent heat transfer to test tubes for maximum uniformity and reliable results. Baked-on enamel finish resists harsh chemicals and hard usage. Versatile operating range of ambient +5°C to 60°C, ±0.5°C accuracy. Read thermometer and adjust calibration screw for your desired temperature. No need to unplug; designed for continuous use. Test tubes and cuvettes stay dry during incubations to eliminate mess and contamination.
