AAC "L" ITEM NSN 6640-01-510-2492

UA: 505A

USAMMA POC: Customer Relations Management, 301-619-4301/4316, DSN 343-4301/4316
UNIT PRICE: \$15,400.00

System Description: A compact centrifugal hematology system for testing of venous or capillary blood using dry technology. This system provides multiple benefits for CBC (complete blood count) testing including eliminating liquid reagents and the liquid biohazard wastes they create. All the reagents needed to perform a CBC test are contained in the QBC STAR tube. After filling the tube with the blood sample, the clinician places the tube in the system, presses the START button and walks away while the system performs the analysis. Also eliminates the need for user calibration and routine maintenance. This analyzer is fully automated and easy to operate with minimal training.

Features:

Measures 9 important CBC hematological parameters from venous or capillary blood samples:

- Hematocrit
- Hemoglobin
- MCHC (mean corpuscular hemoglobin concentration)
- platelet count
- white blood cell count
- granulocyte count and percentage
- lymphocyte/monocyte count and percentage

ANALYZER HEMATOLOGY

MODEL# QBC STAR

NSN 6640-01-510-2492

ANALYZER HEMATOLOGY PHYSICAL & ENVIRONMENTAL SPECIFICATIONS

Dimensions	Height	25 inches
	Width	18 inches
	Length	32 inches
Cube		8.3 cu ft
Weight		66 lb
Operating Temperature		60°F to 90°F
Storage Temperature		-4°F to 149°F
Power Requirements		100-240 VAC ± 10% 47-63 Hz
Watts		185 watts nominal 285 watts peak
Amps		<4 amps
		293 BTU @ 3 tests/hour

ANALYZER HEMATOLOGY (START-UP)
