UNIT PRICE: \$1,189.88

System Description: The Litter Carrier is a light, stable device, equipped with two large non-pneumatic wheels designed for transporting injured persons on rugged terrain. These flat-free tires keep the unit mobile at all times, without the need for a pneumatic pump.

When the supporting legs are in the transport position the patient is easily moved by one or two persons. When the supporting legs are in the "static" position the litter carrier provides a steady and stable support for the patient.

When not in use, the Litter Carrier is easily folded to a compact size for storage.

This unit has proved very useful for transporting and moving injured patients (or materials) inside field hospitals and field hospital areas, Air Mobile Platforms (AMPs), or to provide access to helicopter pads or airlift areas in typical large-scale emergency or natural disaster scenarios.
