USAMMA POC: Customer Relations Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$4,250.00

System Description: The Impulse 7000DP Defibrillator/Transcutaneous Pacer Analyzer Test Systems are rugged, portable precision test instruments that ensure proper operation and ultimate performance of critical life-support cardiac-resuscitation equipment.

The Impulse 7000DP test capabilities encompass the spectrum of world wide established pulse shapes, showcase breakthrough AED technology compatibility, and outperform in accuracy and standards. Additionally, the Impulse 7000DP incorporates the tests and the extensive range of test loads and measurement algorithms needed to test external transcutaneous pacemakers.

- Features:**
- Lown, Edmark, trapezoidal, biphasic and pulsed-biphasic defibrillation technology compatibility
 - AED technology compatibility
 - First-class measurement accuracy $\pm 1\%$ of reading + 0.1 J
 - Intuitive user interface and backlight, easy-to-read display
 - Portable, rugged, easy to carry
 - Long-lasting, rechargeable battery
 - Pacer brand selections
 - Pacer input protected against defibrillator output (7000DP only)
 - Ten independent ECG outputs that provide 12-lead combinations for standardized clinical signals
 - Flexible heart-rate settings (1 BPM step) facilitate rate meter accuracy and alarm testing
 - DSP-based measurements enable future firmware and waveforms upgrade
 - Unique integrated ports for secure connections
 - Optional Ansur test automation software to standardize testing procedures, capture waveforms and test results, and print and document test results
 - Designed, tested, and built to incomparable Fluke quality standards

USAMMA POC: Customer Relations Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$4,956.00

System Description: QA-ES Series II analyzes electrosurgical units quickly and accurately. A wide load-resistance range provides 128 user-selectable loads, including very low loads for testing many of today's ESUs.

An accuracy of $\pm 2\%$ of reading down to 20 mA guarantees reliable high-frequency leakage results. With capability to run an automatic power-distribution test in as little as one minute, the QA-ES works fast so technicians save time.

An Ansur QA-ES software plug-in allows users to create and automatically run tests, capture data, and produce easy-to-read reports with a PC.

- Features:**
- Automatic power distribution measurement, including:
 - Power
 - Current
 - Peak-to-peak voltage (closed load only)
 - Crest factor
 - Oscilloscope output
 - High-frequency leakage measurements with accuracy of $\pm 2\%$ of reading
 - 128 internal user-selectable test loads from 10 to 5200 Ω
 - Foot-switch output for triggering the ESU under test
 - Ansur QA-ES software plug-in for automated test protocols
 - Large display
 - RS-232 and Centronic-printer interface

UNIT PRICE: \$4,341.08

System Description: This equipment item is used for testing of anesthetic vaporizer output concentration. This is the latest development in the line of Riken Gas Indicators based on the optical interferometer principle. The unit makes all the calculations and adjustments for range, anesthetic, and conversion factors automatically.

Features:

- Digital LCD Readout
- Selectable Carrier gas (O2 or Air)
- Selectable Anesthetic Agent: Halothane, Isoflurane, Desflurane, and Sevoflurane
- Gas can be selected with key operation
- Direct digital readout
- Built-in sampling pump
- Data logging stores up to 100 readings with time and date
- Few consumable parts saves maintenance cost

USAMMA POC: Customer Relations Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$15,768.00

System Description: The basic system configuration consists of two primary components: the Base unit and the Detector. Both can be fully upgraded as new features are introduced. There are two versions of the Base Unit - one with and one without mAs capabilities. The system supports both RS-232/USB and the optional Bluetooth data communication protocols. All functions are accessed by pressing one of the two buttons.

This system provides even more accuracy to solid state detectors by using the active compensation feature for all beam qualities. This results in a higher degree of simplicity for the user since no further corrections are needed to achieve maximum accuracy.

Active compensation is a proven proprietary feature. Multiple sensors and advanced calculations automatically determine the beam quality, thereby eliminating the need for further corrections of measured kVp and dose values for both R/F and MAM applications. The unit's active compensation technology has been proven by many users as well as leading international institutes such as the German PTB (Physikalisch-Technische Bundesanstalt*). Solid state sensor technology combined with active compensation results in accurate measurements.

* The highest technical authority of Germany, it is a national institute for science and technology for the field of metrology and physical safety engineering.

UNIT PRICE: \$12,558.30

System Description: The VT PLUS HF, an enhanced version of the popular VT PLUS general-purpose gas flow analyzer, evaluates the pressure, flow and volume delivered by a variety of devices. The VT PLUS HF features special modes designed specifically for testing mechanical patient ventilators, including High-Frequency Oscillatory Ventilators (HFOV).

- Features:**
- Completely standalone operation
 - Bidirectional flow measurements
 - Vacuum and pressure measurements
 - Liquid-pressure measurement
 - RS232 and printer ports
 - High-resolution graphical display
 - 18 secondary calculations
 - User-accessible O2 concentration sensor
 - Complete adapter kit
 - Multiple units of measure for all parameters
 - Minimum, maximum, average, absolute, and graph for all parameters
 - Graphics software compatible with Windows 98, NT, and 2000, providing an interface for recording/playback of calculated data for most VT PLUS HF functions
 - Compatibility with ventilators utilizing bias-flow, PEEP, CPAP, pressure-support, and volume-support technologies
 - Special HFOV mode for high-frequency oscillatory ventilator performance testing
 - Special RT-200 emulation mode for use of familiar RT-200 functions

UNIT PRICE: \$4,895.00

System Description: The 190M Medical ScopeMeter® Portable Oscilloscope is a high-performance, portable oscilloscope that combines the power of a high performance oscilloscope, multimeter and paperless recorder in one test tool. It is used to calibrate, repair, and/or assess functioning of medical devices and other equipment used in healthcare. The 190M has a CAT III 1000 V/CAT IV 600 V rating. It has increased deep memory: 10,000 point per trace waveform capture, so you can examine very small parts of the waveform in detail. Has new battery door accessibility for battery swap out, and optional charger to have the ability to charge another battery. It is environmentally tested to meet IP-51 dust-proof and drip-proof rating and withstand 3 g vibration or 30 g shock. Has two isolated USB host port for direct data storage to a USB memory device. It also has a security slot: lock down oscilloscope with Kensington R lock while unattended. The 190M has four electrically isolated inputs; 6 in full color lcd w/ LED backlight; resolution: 320 x 240 pixels; rugged, shock-proof w/ integrated protective holster; weight: 4.8 lb.

Features:

- The first oscilloscope on the market with CAT III 1000 V/CAT IV 600 V rating
- Increased deep memory: 10,000 point per trace waveform capture, so you can examine very small parts of the waveform in detail
- New battery door accessibility for battery swap out, and optional charger to have the ability to charge another battery
- Environmentally tested to meet IP-51 dust-proof and drip-proof rating and withstand 3 g vibration or 30 g shock
- Isolated USB host port for direct data storage to a USB memory device

Security slot: lock down oscilloscope with Kensington R lock while unattended

USAMMA POC: Customer Relations Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$4,765.60

System Description: The 199XRAY Medical ScopeMeter has all of the normal oscilloscope functions, as well as the speed, performance, and analysis power for the more demanding applications. This high-performance oscilloscope offers specifications found on top-end bench instruments. With up to 200 MHz bandwidth, 2.5 GS/s real-time sampling, and a deep memory of 27,500 points per input, the 199XRAY is ideal for engineers who need the full capabilities of a high-performance oscilloscope in a handheld, battery-powered instrument.

- Features:**
- Up to 200 MHz bandwidth
 - Up to 2.5 GS/s real-time sampling
 - Connect-and-View™ automatic triggering for an instant stable waveform
 - Digital Persistence for analyzing complex dynamic waveforms similar to analog scopes
 - Fast display update rate for seeing dynamic behavior instantaneously
 - Automatic capture and replay of 100 screens
 - 27,500 points per input record length using ScopeRecord™ mode
 - TrendPlot™ paperless chart recorder for trend analysis up to 22 days
 - Up to 1000 V independently floating isolated inputs
 - Waveform reference for visual comparisons and automatic pass/fail testing of waveforms
 - Vpwm function for motor drive and frequency inverter applications
 - 1000 V CAT II and 600 V CAT III safety certified

UNIT PRICE: \$2,492.19

System Description: The MPS450 is Fluke Biomedical's next-generation, portable, multiparameter patient simulator for your comprehensive testing and training needs. Cardiac Output and Fetal/Maternal ECG models are also available.

- Features:**
- ECG simulation/12-lead independent outputs
 - 43 arrhythmia selections
 - Four invasive BP channels including Swan-Ganz
 - Respiration simulation
 - Temperature simulation
 - BP synchronization with ECG
 - Large, bright 4-line by 20-character super twist display
 - R-Wave detection test
 - 9 V battery operation
 - External battery tests (9 V)
 - RS232 port for computer control
 - Compact size
 - Front-panel soft-key user interface
 - Universal ECG connectors
 - High-level ECG output
 - Expansion port

UAs: 9304 , T500 , T501 , T503 , T505

USAMMA POC: Customer Relations Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$5,394.71

System Description: The Index 2 is the most versatile optical simulator for oximeters on the market today. This lightweight, portable tool includes preloaded manufacturers' R-curves and the ability to define other "makes" for most pulse oximeters.

Motion presets, player mode, transmission level control (TLC), and computer commands boost testing ability. The Index 2 can also be configured to include an optional electrical simulation feature with probe test. Optical and electrical simulations allow technicians to isolate problems quickly. The probe test identifies defective probes with quantitative test results.

Features:

- Portable
- Ten preloaded manufacturers' R-curves
- User-definable "makes" for most other manufacturers
- New R-curves for Masimo, Nonin and Philips Medical Systems (formerly Agilent / H-P) oximeters
- Six downloadable R-curve spaces available
- Simultaneous simulation of motion and arterial-oxygen levels
- Arterial wave-amplitude scale, calibrated in units of perfusion
- Tap/shiver motion simulations to explore the impact of motion
- RS-232 port for computer control
- Physiological finger for complete SpO2 tests
- Electrical simulations with probe testing

USAMMA POC: Customer Relations Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$2,300.00

System Description: The Electrical Safety Analyzer is test equipment for biomedical and clinical engineering professionals that perform field service on medical equipment throughout their facilities, in clinics, and anywhere onsite service is required. Portable, lightweight, and designed for operation in tight spaces, the analyzer offers the functionality of a simulator, multimeter, and electrical-safety analyzer in a single test tool.

With selection of two test loads, this versatile product can be used worldwide for compliance testing to preventative maintenance electrical safety standards of choice: ANSI/AAMI ES1:1993 (NFPA-99), IEC62353 (VDE 751), and AN/NZS 3551

The versatility of the multifaceted tester is further expanded with optional automation software, which speeds and simplifies testing and provides high-end analyzer productivity.

- Features:**
- Portable, ergonomic, lightweight, and easy to use
 - Large, easy-to-read display with adjustable contrast
 - Human-factors designed user interface
 - Bale design for stand-up testing in field environments
 - Five applied parts jacks and easy ECG snap connection with optional expander box
 - ECG waveform tests and dual-lead measurements combine the functionality of a simulator, multimeter, and electrical-safety analyzer in a single test tool
 - Replaceable main fuses keep the device in the field and out of the repair shop
 - Internal memory for 100 test records
 - USB connection for use with optional Ansur automation and Data Viewer software (for memory download to PC)
 - Optional Ansur automation software standardizes test procedures, compares results to standard limits, generates/stores reports and provides total digital data management
 - Rigorously tested for rugged field applications, with CE and CS

USAMMA POC: Customer Relations Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$5,899.00

System Description: This item is a tester used to evaluate the performance of any mechanical ventilating device. It is a quantitative test lung which dynamically simulates human physiology. Testing should take place on every ventilator before it is used in the clinical setting. Periodic testing is needed to ensure that the unit is performing in accordance with established standards and manufacturers' specifications. Standards published by the American National Standard Institute (ANSI), the International Organization of Standardization (ISO), and the American Society for Testing and Materials (ASTM) outline minimum performance standards for mechanical ventilators. These are the standards most frequently used by ventilator manufacturers.

This system was developed to allow the comprehensive evaluation and demonstration of ventilation devices and principles. The interactive environment of multiple, overlapping windows and the combination of pull-down and pop-up menus provides a user-friendly system that will instill confidence and provide a useful lung simulation/data acquisition system.

The single lung unit provides an accurate simulation of the structures and mechanics of the adult human pulmonary system. An elastomer bellows with a residual capacity typical of an adult is used to simulate the lung. The unit is completely portable.

The PneuView is a Windows based software program that serves as the link between the TTL (Training/Test Lung) with the data acquisition and processing capabilities of a personal computer.
