

## Hospital MMS Sets

Hospital Medical Materiel Sets (MMS) are now being listed on the USAMMA website for informational purposes only. The computer listings represent the most current component authorizations after reviewing the medical assemblages with appropriate subject matter experts and the Directorate of Combat and Doctrine Development (DCDD). Hospital units are reminded that IAW AR 40-61, chapter 5, they are responsible for maintaining the assemblages and documentation provided when the USAMMA fields their sets. USAMMA will not provide upgrades to any set unless funding is provided either by central sources or by the unit. Units may use these listings for planning purposes or to update sets with their own funding if they so desire. The listings contain all standardized equipment items for Army hospital sets only.

For any questions regarding these listings, please contact the Materiel Acquisition Directorate at 301-619-7403; DSN 343-7403.
