

# Warrior Aid and Litter Kit (WALK)

## Product Description

The WALK is **stowed onboard vehicles** for use by the first responder. The WALK does not replace the Improved First Aid Kit (IFAK) or the Combat Life Saver Bag, but it is complimentary to both and contains a foldable litter and provide the tools to treat and overcome the three most common causes of preventable combat deaths on the battlefield (hemorrhaging, tension pneumothorax, and inadequate airway).

## Benefit Against the Threat

Attacks against lightly armored vehicles continue to be a source of injury and death to our Soldiers. They must rely on equipment carried on the vehicles and individuals to provide care and conduct evacuation. The current vehicle first aid kit cannot meet the minimum requirements for life saving. A need exists for a WALK that can be carried on every vehicle traveling in a convoy or on a combat patrol within the current tactical theaters.

**NSN:** 6545-01-532-4962

**Unit Cost:** \$1,006.70

## Funding (\$M)

The WALK Basis of Issue is recommended as 1 per vehicle. AMEDD does not have central funding allocated against the WALK.

The WALK is AAC "L" (local purchase), and units are able to purchase WALKs via standard Class VIII methods.
