

The Improved First Aid Kit (IFAK), NSN 6545-01-530-0929, is not a USAMMA/AMEDD managed set, kit, outfit (SKO) or Unit Assemblage (UA). Although the IFAK is a Class VIII item and is listed as Acquisition Advice Code "S9M" in MEDSILS, it is being managed by the Assistant Product Manager for Clothing and Individual Equipment in the Program Executive Office (PEO)-Soldier. The IFAK is available in limited quantities through standard DSCP ordering processes, however, PEO-Soldier and the Rapid Fielding Initiative (RFI) do have priority for all needed quantities. It is mandatory that all production of the IFAK be done through the National Institute for the Severely Handicapped (NISH), and as such, alternate procurement or fabrication of this item is NOT authorized.
