AAC 'L' ITEM NSN 6515-01-230-9930

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$281.95

System Description: The Transcutaneous Electrical Nerve Stimulation (TENS) system can help relieve pain symptoms. The system sends electrical impulses through the skin into painful areas. These electrical impulses stimulate the nerves to relieve pain. The operating components of the system are the electrodes, lead wires, and stimulator. The lead wires connect the electrodes to the stimulator. The electrodes are placed on the skin. They complete an electrical circuit, allowing current flow. The stimulator is then used to send electrical impulses through the lead wires and electrodes into the skin.

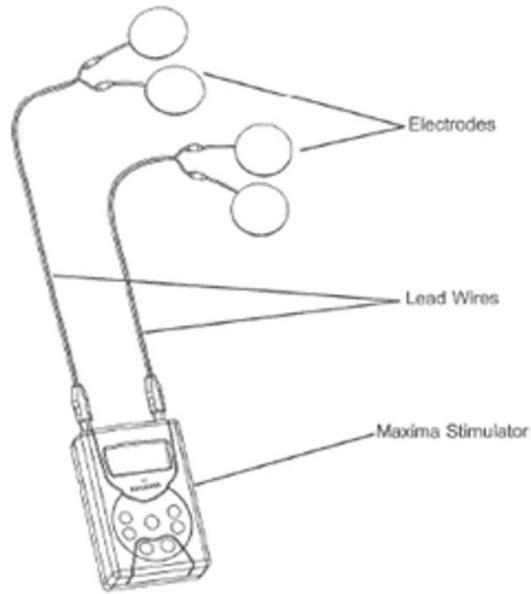

Features:

- Programmable Functions
 - Therapy (Rx) timer
 - Therapeutic modes
 - Pulse parameters
 - Intensity

- Automatic Functions
 - Automatic shut off
 - Programmable recall
 - Battery low message
 - Open circuit reporting

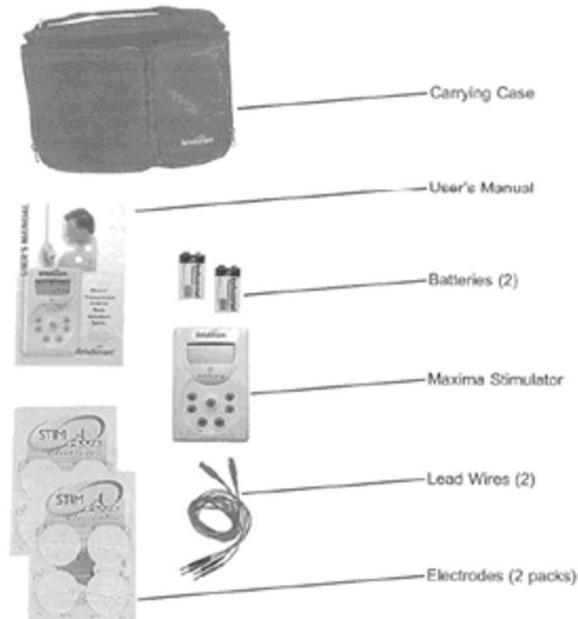

STIMULATOR TRANSCUTANEOUS NERVE 9V BATTERY WITH CASE
PART # 4940S
NSN 6515012309930

Main Operating Components

**STIMULATOR TRANSCUTANEOUS NERVE
PART # 4940S
NSN 6515012309930**

**STIMULATOR TRANSCUTANEOUS NERVE - START-UP
PART # 4940S
