AAC 'L' ITEM NSN 6515-01-462-1607

UAs: 623A

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$760.75

System Description: The Pocket-Dop 3 with digital display is a valuable tool for detecting pregnancy and monitoring the fetal heartbeat. The built in speaker amplifies fetal heart sounds that can help reassure the expectant mother. The Pocket-Dop 3 features interchangeable probes; the 3 MHz probe is for early fetal heart beat detection and the 2 MHz probe is for use later in the pregnancy or with larger patients. The small footprint of these probes enables them to be easily angled down behind the pubic bone for optimum detection of early fetal heartbeats. When not in use, the probe is attached to the side of the unit by a unique magnetic holder.

Features:

- Autocorrelation, a pattern recognition technique, quickly calculates accurate fetal heart rate
- Recharging stand convenient to use and minimizes costs of replacement batteries -- the smart charge system will not overcharge the Doppler, which ensures maximum battery life
