System Description: Offers microprocessor control of an exclusive generated waveform.

High Power and Micro Bipolar Cutting. Advantages of high power as well as micro bipolar cutting of a variety of tissues, with cutting similar to monopolar.

Unique Patented Waveform. Provides efficient, gentle coagulation of tissues whether bathed in body fluids or irrigation.

Dual Foot Pedal Capabilities. MALIS CMC-III Bipolar System provides an electric foot pedal with cut and coagulation capabilities.

Precise Fluid Delivery. The easy to use MALIS Irrigation Module 1000 Bipolar Electrosurgery Irrigator uses a peristaltic pump to deliver a consistent and repeatable rate of fluid to meet a wide range of surgeons needs.

Cost Savings. MALIS CMC-III Bipolar System minimizes procedural disposables cost when used in tumor excision cases, as compared to alternative technologies.

The non-stick mirror finish bipolar forceps systems are complemented by a broad selection of forceps size and types, including irrigating or non-irrigating, stainless steel or titanium, along with insulated or non-insulated. The variety of patterns and sizes provides bipolar cutting and coagulating capabilities for a wide range of neurosurgical procedures. The bayonet style forceps enhances visibility by keeping the surgeon's hand farther from the line of sight. Insulated forceps shafts protect the surrounding tissue when performing deep procedures with irrigation assisting in pipe is completely recessed into the right blade of the forceps. This offers the surgeon increased visibility at the forceps tips. A variety of tip patterns provide a comprehensive system for bipolar coagulation and cutting technologies.

Features: Unique patented waveform provides efficient, gentle coagulation of tissues to reduce the occurrence of sticking and charring of delicate tissues, with or without irrigation. Ultra-low output impedance permits smooth, progressive coagulation of vessels at all power settings, in either dry or wet surgical fields. High power and micro bipolar cutting advantages of high power, as well as micro bipolar cutting of a variety of tissues, with cutting similar to monopolar.
