AAC 'L' ITEM NSN 6515-01-498-2252

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$1,855.72

System Description: The Power Infuser® is the first portable electronic infusion pump designed explicitly for crystalloid and colloid IV fluid management. Small, durable, and easy to use; it can be used at the scene of an accident, during transport, or in the hospital.

Features: **Controlled Delivery:** Improve adherence to protocols; ensure adequate, but not excessive, hydration, whether restoring intravascular volume during circulatory compromise or rapidly infusing a bolus during hemodynamic assessment, the Power Infuser allows unprecedented control of fluid administration. Adjust flow rates from 0.2 to 6 liters per hour or activate the automated 250cc bolus feature.

Occlusion Detection: Don't let a blown IV site or kinked line go unnoticed. With a unique downstream occlusion sensor, the Power Infuser responds to excessive resistance in the fluid path by switching to standby and activating an alarm. Head off complications that could arise from an interruption in flow.

Patient Management: Provide life-saving fluid resuscitation when a lack of personnel or room to elevate the bag impedes treatment. Avoid accidental infusion of air with unique membranes built into each crystalloid/colloid pump cartridge. This device is valuable when battlefield injuries occur, during mass casualty events or for critical care transport.
