AAC 'J' ITEM NSN 6515-01-517-3459

UAs: N513, N713, P302

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$14,800.00

System Description: Extensive clinical evaluations have resulted in the creation of these superior colonofiberscopes. Ease of introduction is enhanced by the combination of a 12.8 mm insertion tube and specially designed graduated flexibility. An extra large 3.8 mm instrument channel provides unsurpassed suction and biopsy capabilities. The PENTAX V-Series scopes completely satisfy the physician's quest to lower expenses without sacrificing quality.

Features:

- Substantial Increase in Resolution

By adding 50% more fibers (compared with conventional P-Series scopes), resolution has been dramatically increased, providing sharp, bright, crystal clear images. Physicians will notice a substantial difference whether it is viewed through the eyepiece or seen on a monitor via an add-on camera.

- Short/Long Distance from Eyepiece

The new PENTAX V-series scopes allow users to view an image through the fiberscope with a greater distance between the eye and the eyepiece. This new innovation permits users with or without eyeglasses to enjoy the sharp, clear images provided by these fiberscopes.

- Easy Snap-On and Autoclavable Components

A variety of components that snap-on rather than screw-off, allow for easier installation and removal from the endoscope. These components include the air/water and suction valves, and channel cleaning adapters. For those institutions and medical professionals requiring the confidence of sterilization by autoclaving, the PENTAX components identified above, along with all check-valves, can withstand the high temperatures of steam sterilization.

- Light Control Body

Using a unique construction, the weight of these PENTAX scopes has been reduced, making them lighter and easier to handle. The compact control body has been crafted to fit comfortably into a physician's hand to increase user comfort.
