**System Description:** Heavy duty cast cutter can be used in fabrication setting and clinical use. The cast cutter combines speed, balance, and quiet operation with durability. Balance of weight and power helps decrease user fatigue which often occurs during long-term usage. Hexagonal drive shaft provides positive drive and prolongs blade wear. Blades may be changed quickly and easily. Solid, permanently lubricated bearings and durable switch provide smooth, maintenance-free operation. Portable cast dust vacuum has a storage system with a place for cast spreader, scissors, replacement blades, and the filter storage caps. Filter system collects cast dust in a unique disposable filter cartridge. System comes complete with a 6-foot heavy-duty hose, 6 hose/cord straps, mounting brackets, and instructions. Blade is made from hardened stainless steel.
