AAC 'L' ITEM NSN 6530-01-260-1227

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$324.13

System Description: This flotation system maintains the Sked in a nearly vertical position in the water. It is self-righting and keeps the patient's head completely out of the water, even in rough seas. The side floats and chest pad provide buoyancy sufficient to support two rescuers in the water in addition to the patient, while the lead shot filled ballast keeps the foot end down and the head elevated out of the water.

Features: The SK-600B SKED Inflatable Flotation System comes with:

- SK-601 Ballast Weight (15 lbs lead shot). A durable bag filled with 15 pounds of lead shot which attaches to the bottom of the SKED with hook and loop fasteners. This causes the SKED to self right if it capsizes.
- SK-602 Inflatable Chest Pad Available in Black for military applications the chest pad attaches to the front of the packaged patient, not allowing the patient to float in a face down position. The chest pad is fully inflatable.
- SK-605/SK-606 CO2 Inflatable Float 5" Diameter Logs (pair). Each of the float logs has an inflatable bladder covered with durable black nylon. The logs can be inflated instantly with the included CO2 cartridges, or can be inflated by mouth.
- SK-653 CO2 CARTRIDGE - 25g (pair)
- SK-604 Extra Long Handles
