AAC 'L' ITEM NSN 6530-01-265-3583

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$165.37

System Description: This spinal immobilization/extrication device is the only device of its type that meets all of the established criteria for immobilizing a seated patient. An ideal companion for the Sked® Stretcher System, when properly used the SK-300 provides for safe removal of patients from injury sights without doing further damage to the spine. The unique criss-crossing shoulder strap design provides superior immobilization without restricting breathing and, for clavical fractures, can be re-configured to retract and immobilize the shoulders. The SK-300 is designed to provide easy access to the patient's chest or abdominal area for treatment or diagnostic procedures. It can be used in place of a conventional short backboard and as a hip or leg splint. The SK-300 includes a shoulder board not found in similar devices, which can be used to prevent compression of the shoulders when using a flexible stretcher.

Features: The SK-300 OREGON SPINE SPLINT II™ (OSS II™) comes with:

- SK-300 OSS II™ Main Body
- SK-301 OSS II™ Collar Strap
- SK-302 OSS II™ Forehead Restraint
- SK-302A Dispos-A-Pads™
- SK-303 OSS II™ Shoulder Board
- SK-304 OSS II™ Head Pads
- SK-305 OSS II™ Carrying Case
