AAC 'J' ITEM NSN 6530-01-510-4685

UAs: 267B, P302

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$999.00

System Description: Rapid readout biological indicator and test packs designed to monitor the effectiveness of the steam sterilization process with results in three hours. System includes biological indicators, auto-reader, and log books. This unit reads fluorescence produced by positive 3M attest rapid readout biological indicators 1291 and 1292 to indicate a sterilization process. An audible alarm and a red light indicates a sterilization failure. A green light indicates that sterilization conditions have been met.

Biological indicators provide the best assurance of sterility. They measure true lethality. The system includes rapid readout biological indicators, disposable test packs, auto-readers.

3M™ Attest™ 1292 Rapid Readout Biological Indicators

Self-contained BI for 250 °F (121 °C) gravity and 270 °F (132 °C) vacuum-assisted cycles consisting of a Geobacillus stearothermophilus spore strip; sealed glass ampule and brown color-coded cap. The BI provides results in three hours in the 3M™ Attest™ 290 Auto-reader.

- Features:**
- 1292 Rapid Readout Biological Indicators are designed to monitor 250 °F (121 °C) gravity and 270 °F (132 °C) vacuum-assisted steam sterilization processes
 - Provides results in three hours
 - Self-contained biological indicators significantly reduce possibility of contamination, minimizing false positives and assuring more accurate results
 - Faster result time, making it possible to quarantine every load and eliminate recalls
 - System can help reduce the costs associated with fighting infections - cost measured in both dollars and time spent
 - Color-coded for quick reference and easy use
 - Test packs present a challenge to the sterilization process and meet AAMI test pack recommendations

INCUBATOR AUTO-READ

3M RAPID ATTEST BIOLOGICAL INDICATORS
PART # 1291 & 1292

Rapid Readout Biological Indicators and Test Packs

- Results in one hour (1291), three hours (1292) or four hours (1294)
- Test packs present a challenge to the sterilization process as do the AAMI recommended packs
- Make decisions and take appropriate action before surgery
- Every load monitoring and quarantining can eliminate recalls
- Malfunctioning sterilizers can be repaired and put back into service quickly
- Each test pack contains a 3M™ Attest™ Rapid Readout Biological Indicator
- The 3M™ Attest™ Rapid Readout Biological Monitoring System can help reduce the costs associated with fighting infections—a cost measured in both dollars and time spent

Cat. No.	Description	Packaging	Shipping
3M™ Attest™ Rapid Readout Biological Indicator for 132°C (270°F) Gravity Displacement Steam Sterilization			
1291*	Steam Biological Indicator (Blue cap)	50 each/box	4 boxes/case
3M™ Attest™ Rapid Readout Biological Indicators and Test Packs for 121°C (250°F) Gravity and 132°C (270°F) Vacuum-Assisted Steam Sterilization			
1292*	Steam Biological Indicator (Brown cap)	50 each/box	4 boxes/case
