System Description: This unit's active compression technology enhances the delivery of cold therapy, helping Game Ready to provide faster, deeper, and longer-lasting cold than other cryotherapy products. You want to do more than treat symptoms; you want to accelerate healing. This unit goes beyond damage control to proactively help you recover faster.

Features:

Cold

- Decreases pain, muscle spasms, edema, and swelling
- Reduces metabolic activity and demand for oxygen, reducing secondary tissue damage

Compression

- Aids the prevention of edema formation and removal of swelling

Active Cold

- Draws heat away from the injury site for more efficient temperature reduction

Active Compression

- Mimics natural muscle contractions, “pumping” edema out of the injured area
- Optimizes lymphatic drainage
- Increases blood flow and oxygen delivery
- Simulates tissue repair, encouraging acceleration of the healing process

Active Compression with Active Cold Therapy

- Improves surface contact for faster, deeper, longer-lasting cooling
