USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$165.00

System Description: TSSI (Tactical & Survival Specialties, Inc) M-4 special operations medical bag was designed to fulfill the operational need for a comprehensive field portable medical bag. The M-4 is smaller than the issue M-5 medical bag and yet larger than the M-3/Unit 1 carried by combat medics and Navy corpsmen. The M-4 bag was designed by a current special operations physician's assistant (PA) who was also a former Special Forces 18D Medic. The M-4 is broken down into three sections, the Dressing/Bandage compartment, the Airway Panel, and the Rear Storage & IV compartment. Its primary method of transport is attached to the standard issue ALICE (All-Purpose Lightweight Individual Carrying Equipment) or MOLLE (MODular Lightweight Load-carrying Equipment) rucksack. The M-4 can also be carried as a patrol pack, a fanny pack, or by its grab handles like a gym bag or briefcase. In addition to the 3 operational sections, the M-4 has drain holes in the bottom and is designed with a rain flap over the zipper so that when carried on top of the rucksack, water is repelled. Also, modular attachment points are located on the front and side of the pack that will accept additional pouches with ALICE or MOLLE attachment devices. Manufactured in the USA.

Features:

- Smaller than the M-5 but larger than the M-3
- Designed by a former Special Operations 18D Medic
- Divided into three sections
- Dressing/bandage compartment
- Airway panel
- Rear storage and IV compartment
- Attaches to standard ALICE or MOLLE rucksack
- Can be carried as a patrol pack or fanny pack
- With handles to carry like a briefcase or gym bag
- With drain holes and rain flap-protected zipper
- Features front modular attachment point
- Made in the USA

NOTE: NOTE: PACKED BY USER
