System Description: The Lead In Water test is a revolutionary product designed to make testing for lead safe, easy, and affordable. This patent pending device utilizes a lateral flow test strip, similar in technology to home pregnancy and ovulation tests. With accurate, reliable results being achieved in just 10 minutes, the Lead In Water test clearly gives results conforming to the USEPA (United States Environmental Protection Agency) guideline of 15 ppb ($\mu\text{g/L}$). Using the supplied pipette, simply fill the vial with your water sample, place the test strip into the vial, and wait 10 minutes for the results -- no boiling or potentially harmful chemicals required.

- Features:**
- Detection levels: tests for the EPA limit of 15 ppb Lead in water
 - Test methodology: lateral flow immunoassay strip
 - Test time: 10 minutes
 - Number of tests: 2 immunoassay strips
