System Description: An easy-to-use operating system, closed tube sampling, and state-of-the-art inter-laboratory quality control program. Utilizing just 15 µL of sample, this unit is ISBT 128 compliant and has the ability to do discrete reporting on platelet counts. These discrete counts can be used to optimize donor collection time. This unit will help maximize the therapeutic benefit that can be derived from each pheresis procedure by accurately determining platelet pre-counts, aiding in determining the number of therapeutic doses that can be collected per procedure.
