UAs: 220B

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$902.78

System Description: These multi-purpose units are ideal for incubation and activation of cultures, enzyme reactions, blood urea nitrogen determinations, immunoassays, melting/boiling points, and a wide variety of other laboratory procedures. The economical, versatile, and compact block heaters are designed for applications that require repeatable results and superior temperature stability.

Easy-to-use front-mounted controls with independent LED displays show actual and set point temperatures. Microprocessor control offers a stability of 0.1 °C, while independent controls allow users to adjust temperature settings in ±0.1 °C increments. A timer will display elapsed time or when programmed to user-defined limit, will count down to zero and shut off unit. Audible alarm will sound when time reaches zero.

All dry block heaters include a built-in support rod holder for mounting the probe kit. Optional external temperature probe kit monitors actual block or sample temperature. An LED display on the front panel will show actual probe temperature and adjust heater output to maintain user-defined set point. Kit includes 20.3 cm (8 inch) stainless steel probe, 45.7 cm (18 inch) vertical support rod, thermometer/probe extension clamp, and hook connector.

All 120 V units are UL and C-UL listed and CE marked.

Caution: To avoid possible electrical hazard, do not fill well or block opening with water or other fluids. Unit is designed as a dry bath/incubator.

- Features:**
- Exceptional Temperature Uniformity and Accuracy
 - Hold Interchangeable, Modular Heating Blocks
 - Heat to 120°C (248°F)
 - Optional External Temperature Probe
 - LED Display
