

Deployable Medical Equipment Training Courses Available Online

The United States Army Medical Materiel Agency (USAMMA), in cooperation with the Distributed Learning Division of the Army Medical Department Center and School (AMEDD C&S)), announces the availability of medical equipment training courses through the Joint Knowledge Online (JKO) (<http://jko.jfcom.mil>) web site. These medical equipment training courses are intended to familiarize operators and biomedical equipment specialists with operation and maintenance of deployable medical equipment supported by the USAMMA. This is an excellent opportunity for operators and biomedical equipment specialists from all Services to become familiar with medical equipment for Table of Organization and Equipment (TOE) medical units fielded and supported by USAMMA. The courses have been developed for 18 different equipment items, and are one to two hours in length. All courses include a set of multiple-choice questions to verify that students have met learning objectives and a certificate is generated for those who score above 80%.

Each Operator course includes the following topics: Introduction, Equipment Set-Up, System Familiarization and Parameters, Operator-Level care and Maintenance, and Summary.

Each Maintenance course includes the following topics: Introduction, Overview of the Medical Device, Safety Considerations, Setup and Preventative Maintenance Checks and Services (PMCS), Calibration Verification, and Summary.

To find all the courses on JKO, login to the site and type "MED" in the "Course Number" column below the "Search" prompt found under the "Course Catalog" tab. All the courses will be listed and ready for you to enroll and launch. The courses currently available are listed in the next page.
