SAMS-E Property Book Recon

The initial screen of the property book reconciliation tool. Find your installation, then SAMS2E site, and finally your UIC.

COMPILED Report

This is a report for the 28th CSH B Company. This is the Unit Recon Summary that will show the quantities of items in both PBUSE and SAMS. If the quantity columns match, then your activity is on the correct path. If not, more research must be done to identify why. You are not necessarily wrong, some items do not require maintenance so they should not be loaded in SAMS. All items are accounted for on some hand receipt component listing and should be captured at the unit level in PBUSE.
