ASSISTANCE PROGRAM"*

# USAMMA'S LOGISTICS ASSISTANCE PROGRAM (LAP)

## *Medical Logistics ..... is Our Business*

**THE U.S. ARMY MEDICAL MATERIEL AGENCY (USAMMA) ARMY MEDICAL DEPARTMENT (AMEDD) LOGISTICS ASSISTANCE PROGRAM (LAP) IS FOCUSED ON VITAL MEDICAL LOGISTICS ISSUES THAT AFFECT THE READINESS OF THE DEPLOYABLE FORCE**

The primary goal of the LAP is to assist major commands and unit commanders in analyzing the true readiness posture of their units. The LAP does not conduct inspections. The program provides a tailored assessment with recommendations which are only shared with the requesting unit. In addition, the LAP ensures that USAMMA has sufficient medical logistics information to accomplish the mission.

The LAP provides customer-oriented support, whether for simple questions or an in-depth review of a units medical logistics readiness.

## **AREAS OF ASSISTANCE**

The USAMMA LAP focuses on six areas:

- Medical Materiel Support
- Medical Fielding Issues
- Medical Materiel Containerization, storage and transportation
- Quality Assurance of medical materiel
- Medical Equipment Maintenance Support
- Readiness Reporting, including Non-medical ASIOE

## **TYPES OF ASSISTANCE**

The USAMMA LAP is here to assist all Active Army, Reserve Components, and National Guard field medical unit.

Based on the unique personnel and experience base within USAMMA, direct communication between field medical units and USAMMA is authorized and encouraged. However, units are highly encouraged to share this coordination with their chain of command.

## **REQUESTING ASSISTANCE**

- The USAMMA LAP can be contacted by, phone, email, or through the USAMMA webpage.
- Once contact is established, the LAP will work with the unit to determine the best type of support.
- When required, the LAP Team will travel to a unit's location in order to directly work with them and identify logistics readiness issues.
- In addition, USAMMA provides assistance in resolving issues dealing with unsatisfactory support from other-than-medical supply sources when these issues cannot be resolved at the Army Command (ACOM) level.
